

# **One-Click Install Software**

## Get your website up and running in minutes

Choose from our huge range of one-click install scripts to get your website online in just a few clicks of your mouse. Whether you are building a brochure website, e-commerce store, blog, forum, or even a social network, you will find software to create a professional looking site using the latest technology.

With our one click install software you don't need to worry about zip files, programming or setting up databases. All you have to do is click on the relevant icon and you are done.

It is as easy as that!

## Choose from our huge range of one click install scripts, ideal for any type of website.

### WordPress

WordPress is the world's most popular open source blogging platform, perfect for both commercial and personal use. Thanks to a massive community of designers and developers, there are literally tens of thousands of themes, widgets, and plugins available to download, meaning no two websites are ever the same.

WordPress can be easily adapted for use as a standard CMS (content management system), so even if you don't need a blog, you can use WordPress to power your e-shop, photo gallery, video webpage, article-based site, directory, or any other type of website you can think of.

### Joomla!

Joomla! is a user-friendly content management system with a huge range of features ready to use. The software is database-driven and ideal for website owners looking to develop, manage, and edit web content without much technical knowledge.

With a wide range of modules, components, plugins, and languages available for free, you can customise and enhance your Joomla! CMS to your specific requirements.

## **Drupal**

Drupal is a highly customisable content management system with thousands of modules, themes, and plugins to extend and alter its capabilities. Winner of multiple Open Source CMS awards, Drupal is ideal for those wanting a versatile and expandable web content solution. Drupal CMS can be used for a wide range of sites, including single and multiple user blogs, forums, communities, magazines, e-commerce solutions, photography showcases, galleries, and much more.

## **OpenCart**

OpenCart is a powerful and feature rich e-commerce solution, built to appeal to all experience levels and allow anyone to create and manage an online store. OpenCart comes with a range of features you would associate with high-end enterprise-level software, such as multiple currency support, comprehensive sales reports, and integrated search engine optimisation tools.

## **Concrete5**

Concrete5 is a powerful CMS built with every level of web design experience in mind. The easy to use WYSIWYG-style editing features make it easy for site owners to make changes on the fly with no previous web design experience. The software is also perfect for web designers and developers looking for a purpose-built CMS designed to be as flexible as you need it to be.

Concrete5 can be used for a wide range of sites, including personal and business websites, forums, communities, magazines, e-commerce solutions, photography showcases, galleries, and much more.

### **phpBB**

Create your online community using the market-leading forum software. With an extensive community of designers and developers creating and sharing modifications and styles to customise your forum, you can create a unique forum quickly and easily.

### **bbPress**

Using WordPress as its platform, bbPress is open source forum software focused on speed and security, meaning you don't have to worry about slow loading pages or the risk of being hacked. The streamlined software is also lightweight and efficient for better use of space and bandwidth. bbPress enjoys many similar customisation elements to WordPress so you can develop and install themes and plugins (e.g. for ratings, video and private forums) to customise your forums.

### **Vanilla Forums**

Vanilla Forums is an easy to use and powerful solution for sites looking to add discussion functionality to their website. Simple copy and paste code and integrated WordPress installation features make getting started a breeze.

### **Open Web Analytics**

Open Web Analytics (OWA) is a comprehensive web analytics software package that you can use to track and analyze how people use your web sites and applications.

## **Other one-click install software we offer include:**

### **PrestaShop**

PrestaShop is one of the fastest and lightest Open Source e-commerce solutions available. PrestaShop comes with a wealth of features allowing you to create a e-commerce website customised to meet all your needs.

## **TomatoCart**

TomatoCart was a finalist in the 2010 Open Source awards, and has built a reputation as a user-friendly and lightweight e-commerce framework.

## **Simple Invoices**

Simple Invoices is an open source, web-based invoicing system for business of all sizes. Even if you trade exclusively offline, you can use Simple Invoices to bill customers, track payments, and much more. This browser based application can be used from any PC anywhere.

## **Pligg**

Use Pligg to start your own social bookmarking and publishing community in minutes. Add the bookmarking and voting functionality to your existing website or create a new one just for this purpose in the same vein as Digg.

## **Piwik**

Piwik is an open-source web analytics software program showing real time data and statistics. It will provide you with detailed reports on your website's performance and help you monitor visitor data.

## **Simple Machines Forum**

Simple Machines Forum is a free, professional-grade software package that allows you to set up your own online community within minutes.

## **LimeSurvey**

LimeSurvey is an online web application designed to help you develop, publish, and collect responses to online (and offline) surveys you are running.

## **Elgg**

Elgg is an award-winning social networking engine, giving you the tools to create your own fully-featured social networks and applications. Elgg allows you to take full advantage of the power of social technology with elegant, flexible solutions for organisations, groups, and individuals.

## **Nucleus**

The building blocks you need to create a web presence, Nucleus CMS can help you achieve your goals, whether you want to create a personal blog, a family page, or an online business site.

## **Geeklog**

Allows you to create your own virtual community area, complete with user administration, story posting, messaging, comments, polls, calendar, weblinks, and more.

## **SugarCRM**

Lets a business keep track of its relationships with its customers. Users can manage customer accounts, contacts, sales leads, calls, meetings, etc. A dashboard showing the most successful leads, the sales pipeline, and the month-by-month outcomes for opportunities in the pipeline can be displayed.

## **MediaWiki**

A collaborative technology for organizing information on web sites, allowing you to work with others to maintain information. For example, if you run a business, you can share information with your colleagues at the same time as documenting it for yourself.

## **Mambo**

Fully featured content management system that can be used for everything from simple websites to complex corporate applications.

## **CMS made simple**

A content management system to help experienced web developers and designers to create sites of power and beauty in a fraction of the normal time.

## **Revive Adserver**

Revive Adserver gives you the tools you need to make the most from online advertising. With Revive Adserver, you will be able to manage sophisticated advertising programs and stay in control of all the advertising on your websites.
